

JUVENILE DETENTION PROFILE SURVEY

FOURTH QUARTER CALENDAR YEAR 2015
SURVEY RESULTS

EXPLANATION OF RESULTS

The following pages contain the Juvenile Detention Profile Survey (JDPS) results for the Fourth Quarter of Calendar Year 2015. Page 2 contains totals for major categories such as the average daily population (ADP), highest one-day population, gender, and age range of detained minors. Page 3 contains information regarding counties' ADP and rated capacity (RC) breakouts, and page 4 contains information about a wide range of juvenile detention facility issues, including mental health needs, crowding, number of bookings, and average length of stay.

Please keep the following in mind when reviewing this information:

- For overall capacity, crowding (highest one-day population – the count of minors in detention on the day of each county's highest population) and ADP (the average daily detention population for the reporting period), we have complete data from all jurisdictions in the state that operate juvenile detention facilities.
- Each jurisdiction provides us with the average population, computed across all the days in the month, for each of the three months in the quarter. The weighted average across the three months is then computed for each jurisdiction (with the monthly averages weighted by the number of days in the month). The jurisdictions' ADPs are then combined to produce the state's total ADP.
- For some variables (other than ADP), we did not receive complete data from all jurisdictions. In such instances, we used statistical procedures to estimate the statewide total.
- Felony/misdemeanor, gender counts, and age-range breakouts are based upon a one-day snapshot (on the 15th day of the final month of the quarter). These values are used to determine the percentage of the population in each felony/misdemeanor, gender, and age-range category. The percentages are then applied to the total ADP to project the expected ADP in each of the felony/misdemeanor, gender, and age-range categories.
- In addition to the population breakdowns for juvenile halls and camps, the report contains like information for youth who were part of non-facility based, alternative to detention programs. Youth in that category are listed under "Other Detention." Other detention includes home supervision with and without electronic monitoring, day reporting centers, work programs, and other alternatives to detention **for which youth are credited with custody time.**
- **Please note:**
 - Each quarter, every county with juvenile detention facilities submits their data to the Board of State and Community Corrections (BSCC). While we make every effort to review data for accuracy, including contacting individual counties for clarification, the BSCC cannot be responsible for data reporting errors made at the county level.

INSTRUCTIONS FOR INTERPRETING THE SURVEY REPORT

The Overall Capacity, Population and ADP page (*page 2*) is designed to present the JDPS results for the major reporting categories.

- **Capacity:** this category presents the RC in terms of the number of beds in juvenile halls and camps/ranches that meet the BSCC standards.
- **High One Day:** for each month in the quarter, each jurisdiction reports the juvenile hall and camp/ranch populations that together constituted the highest one-day count of the month.
- **Other:** this category refers to the sum of all juveniles who are receiving custody credit while on home supervision, with or without electronic monitoring, or are in alternative confinement programs.

The County Breakout Report page (*page 3*) is designed to present county-specific information.

- **County comparison:** this page identifies the ADP for each county and the percent that county contributes to the total state juvenile detention population. The counties are ranked in descending order based on their percentage of the overall juvenile detention population in the state.

The JDPS additional information page (*page 4*) is designed to present all the remaining JDPS results not already listed.

- **One Day Snapshot:** the percentages in this section are percentages of the total ADP for juvenile halls, camps/ranches, and other juveniles in the system.
- **Average number of days that one or more facilities in a county exceeded the RC:** this value is the result of taking all of the counties “number of days of crowding” and averaging the figures submitted by all the jurisdictions. If a jurisdiction had no crowding days, that jurisdiction was not included in the computation. In other words, the value presented indicates the typical number of crowding days per month experienced by jurisdictions that have had one or more days of crowding in the Fourth Quarter of Calendar Year 2015.
- **Average Length of Stay:** these numbers are averages for all juveniles in each category:
 - 1) “Juvenile Hall (all releases)” is computed by first taking the mean length of stay for all juveniles released from juvenile halls in a jurisdiction. Next, all the jurisdictions’ means are averaged to produce a statewide figure.
 - 2) “Juvenile Hall to Camps [ranches]” is computed in the same fashion, but includes only those juveniles released from juvenile hall and placed in a camp or ranch.
 - 3) “Juvenile Hall to other out-of-home placements (i.e. group homes or foster homes)” presents the average length of stay for that subset of juveniles.
