BACKGROUND

The Board of State and Community Corrections (BSCC) is the State Administering Agency that receives and disburses federal Title II formula grants to support state and local efforts in delinquency prevention and juvenile justice system improvement. To remain eligible for such funds, the BSCC must maintain compliance with the Juvenile Justice and Delinquency Prevention Act (JJJPA) of 2002 (as amended), which is the sponsoring legislation for both the Title II formula grants and the state's juvenile justice advisory group. California's state advisory group is the State Advisory Committee on Juvenile Justice and Delinquency Prevention (SACJJDP). The SACJJDP is a governor-appointed group of subject matter experts who serve as an Executive Steering Committee to the BSCC.

A requirement for compliance with the JJJPA is submission of an annual report from the state's juvenile justice advisory group to the Governor and Legislature, with recommendations regarding compliance with the first three of the four JJJPA core requirements (those specifically related to compliance monitoring). The fourth core requirement (Reducing Disproportionate Minority Contact) is addressed separately and is not a part of the annual report to the Governor and Legislature.

Pursuant to the JJJPA, 42 U.S.C. 5633 Sec. 223., State plans, Subs. (a)(3)(D)(ii):

In order to receive formula grants under this part, a State shall submit a plan for carrying out its purposes applicable to a 3-year period. Such plan shall be amended annually to include new programs, projects, and activities. The State shall submit annual performance reports to the Administrator which shall describe progress in implementing programs contained in the original plan, and shall describe the status of compliance with State plan requirements. In accordance with regulations which the Administrator shall prescribe, such plan shall...provide for an advisory group, that...shall...submit to the chief executive officer and the legislature of the State at least annually recommendations regarding State compliance with the requirements of paragraphs (11), (12), and (13) (referred to as "core requirements.")

The JJJPA's core requirements relative to compliance monitoring are:

1. Deinstitutionalization of Status Offenders¹ (DSO)

Prohibits, with specific exceptions, juveniles who are charged with or who have committed an offense that would not be criminal if committed by an adult (status offenders, truants, in-state runaways) from being held in secure detention.

¹ 42 U.S.C. 5633 Sec. 223., State plans, Subs. (a)(11)

2. Separation²

Prohibits youth who are under the jurisdiction of the juvenile court from having sight and/or sound contact with adult inmates while in secure detention.

3. Jail Removal³

Prohibits the secure detention of youth in a lock-up or jail for longer than six (6) hours.

This report will provide the Governor and Legislature with the most recent data submitted to the Office of Juvenile Justice and Delinquency Prevention (OJJDP), as well as the SACJJDP's recommendations regarding compliance with the core requirements.

COMPLIANCE WITH CORE REQUIREMENTS

BSCC staff monitor nearly 1,200 law enforcement facilities for compliance with the core requirements. Through data collection and inspection, the BSCC annually determines the number of violations of core requirements at these facilities, and in accordance with the JJDP, submits an annual report on compliance to the Office of Juvenile Justice and Delinquency Prevention (OJJDP).

Attachment A contains the 2017 submission of the BSCC's annual compliance monitoring report for the federal fiscal year reporting period of October 1, 2016 through September 30, 2017; Attachment B is a summary of violations of the core requirements since 2003.

With the exception of the separation core requirement, California is able to maintain compliance with the core requirements so long as the rate of violations does not exceed a "de minimus" number of violations as established in guidance by the Office of Juvenile Justice and Delinquency Prevention (OJJDP). There is no de minimus for the separation core requirement; if there is one violation, the state is out of compliance with that requirement.

California remains in de minimus compliance with the DSO and jail removal core requirements. Since 2003, DSO violations have decreased 82%; violations of jail removal have decreased nearly 31%. There have been violations of the separation requirement over the years; however, the BSCC has determined that each of these incidents were isolated and has provided necessary statements of explanation to OJJDP.

Since 2003, rates of violation have generally decreased; in some cases exponentially (see Attachment B). It should be noted that even with a significant increase in the number of law enforcement facilities in the compliance monitoring universe, overall rates of violations have continued to decline.

² 42 U.S.C. 5633 Sec. 223., State plans, Subs. (a)(12)

³ 42 U.S.C. 5633 Sec. 223., State plans, Subs. (a)(13)

BARRIERS TO COMPLIANCE AND STRATEGIES TO OVERCOME THEM

- The volume of admissions to juvenile detention facilities, adult jails and lockups makes it difficult for the BSCC to review all appropriate data outside of the biennial inspection cycle.
 - The BSCC has streamlined its data collection process, making it easier for law enforcement agencies and probation departments to submit information.
- The sheer number of facilities in California (nearly 1,200) makes it difficult to verify all appropriate data annually on-site.
 - The BSCC has developed a compliance monitoring team to concentrate solely on compliance monitoring inspections.
- The turnover in local correctional staff creates a gap of knowledge with respect to core requirements in some facilities; constant training is required.
 - The BSCC provides on-going technical assistance to law enforcement agencies and probation departments, both general and targeted.
 - If a facility's data appears inconsistent with previous data, or if there is an increase in violations, specific technical assistance and training will be provided.
 - The BSCC developed training aids specific to the Jail Removal core requirement.
 - The BSCC completed a 40-minute training video that outlines federal and state requirements relative to minors in detention. The training video is accompanied by a workbook designed to aid the detention facility staff.
 - BSCC staff provides pre-inspection briefings to law enforcement agencies and probation departments; all information relevant to the upcoming inspection is provided, including detailed information on core requirements and essential data.

SACJJDPA RECOMMENDATIONS

Based on the pattern of decreasing violations of the JJDP core requirements, continuous training and technical assistance provided to the field, and the maintenance of de minimus compliance, the SACJJDPA recommends that the Governor and Legislature continue to support the BSCC's approach to compliance monitoring, including strategies to overcome the barriers mentioned above. The SACJJDPA also recommends that California's update to the 3-Year Plan for the application to the OJJDP FY 2018 Title II Formula Grants program highlight the BSCC's efforts to maintain compliance with the core requirements.

In 2006, we increased our lockup universe and also began to clean up status offender reporting methods and training. In 2007, we began reporting status offenders held in lockups, therefore increasing the DSO TOTAL and the JAIL REMOVAL TOTAL numbers. In 2016 the reporting period changed from a 12-month calendar year to a 12-month federal fiscal year beginning October 1st and ending September 31st.
